**Job Description**

Keefer Haz Mat Services Ltd. based in Cranbrook, BC is seeking a field technician to join our diverse team of experienced health and safety professionals. The ideal candidate will hold a degree or diploma in building sciences (including trades), engineering, or environmental science; however, individuals with the right combination of education and experience will be considered. Keefer Haz Mat Services is willing to fund training and upgrading as necessary for the right candidate.

**Duties & Responsibilities**

- Aid in the management and coordination of projects;
- Field work including data and sample collection for hazardous material surveys, risk assessments, indoor air quality monitoring and environmental site assessments;
- Monitor abatement projects, including hazardous building materials and other environmental contaminants;
- Preparation of reports; and,
- Maintenance of client relationships.

**Qualifications****Education & Certifications:**

- Degree or diploma in engineering, building sciences (including trades) or equivalent experience;
- AHERA Asbestos Building Inspector and/or PCM training considered an asset;
- Knowledge of confined space entry considered an asset; and
- Class 5 driver's license with good record.

**Skills & Abilities:**

- Well-developed multi-tasking skills, rapid-learning, innovative and creative;
- Lead and work effectively with others; and
- Problem solve and make new plans as circumstances dictate.

To apply please submit a cover letter and resume to [lizzy@keefereco.com](mailto:lizzy@keefereco.com). The position will remain open until filled.
